To the attention of the Hiring & Technical Leadership Team

Date: August 26, 2026

Software Engineering & Information Systems Department

Tunisia / International

Subject: Application for Software Engineer / Full-Stack Engineer Position

Dear Hiring Team,

Passionate about architecting high-performance software systems, modern full-stack development, and integrating Artificial Intelligence technologies, I am writing to express my strong interest in joining your engineering organization as a **Software Engineer / Full-Stack Engineer**.

Holding a National Engineering Diploma in Software Engineering with an academic background in **Data Science** (ISSAT Gafsa), I bring over three years of hands-on experience in software design, 0-to-1 product engineering, and enterprise system delivery:

- **Full-Stack Engineering & REST APIs:** Deep proficiency across backend architectures (Java/Spring Boot, Node.js/Express, Python/FastAPI), modern frontend interfaces (React.js, Next.js 15, TypeScript), real-time communication (WebSockets), and robust security mechanisms (JWT, RBAC).
- **0-to-1 Product Ownership (CertifUp - Capstone Project):** Authored a 60+ page feasibility study (22 competitors benchmarked), architected a 4-microservice platform with 25+ OpenAPI REST endpoints, and established automated Docker/Jenkins CI/CD pipelines with 88% test coverage.
- **Enterprise Scale Systems (CPG TMS & YAZAKI):** Digitized supply chain operations across 7 mining extraction basins (>85% request turnaround reduction, 100% financial reconciliation) and engineered competency matrix systems across 6 automotive departments with ISO 30414 audit compliance.
- **Applied AI & Workflow Automation:** Integrated LLM APIs (Google Gemini, OpenAI), Prompt Engineering, and automated business workflows, eliminating >40% of manual operational tasks.
- **Databases & DevOps Practices:** Relational schema design (PostgreSQL, MariaDB, MySQL), Redis caching, Docker containerization, CI/CD pipelines, and Agile/Scrum collaboration.

Autonomous, rigorous, and an effective communicator in both English (C1 Professional) and French, I am **immediately available** to contribute to your engineering roadmaps (on-site, hybrid, or remote).

I would welcome the opportunity to discuss how my technical skills and engineering mindset align with your goals during an interview. You can explore my live project demos on my portfolio (fahedmbarek.tech) and inspect my source code on GitHub (github.com/Fahedmb).

Sincerely,

Fahed Mbarek

Software Engineer | Full-Stack Engineer
